

Invigorating Science and Technical Instruction: Strategies That Address the Common Core Standards

In this intensive, hands-on institute, participants will explore the California Common Core Standards, looking through the lens of science and technology. Content-specific literacy strategies will be shared and developed, and using best practice as a guide, teachers will develop curricular materials to take into their classrooms in the fall.

When: July 30 – August 3, 2012; 9:00am – 3:00pm

Where: Michael D. Eisner College of Education; California State University, Northridge

How: Register and pay online at www.csun.edu/writingproject or complete the application on back of this flyer.

Cost is just \$300 for the week; including a library of content-specific resources
